Team ID	
Project Name	Smart Lender
Maximum Marks	3 Marks

Project Executable Files

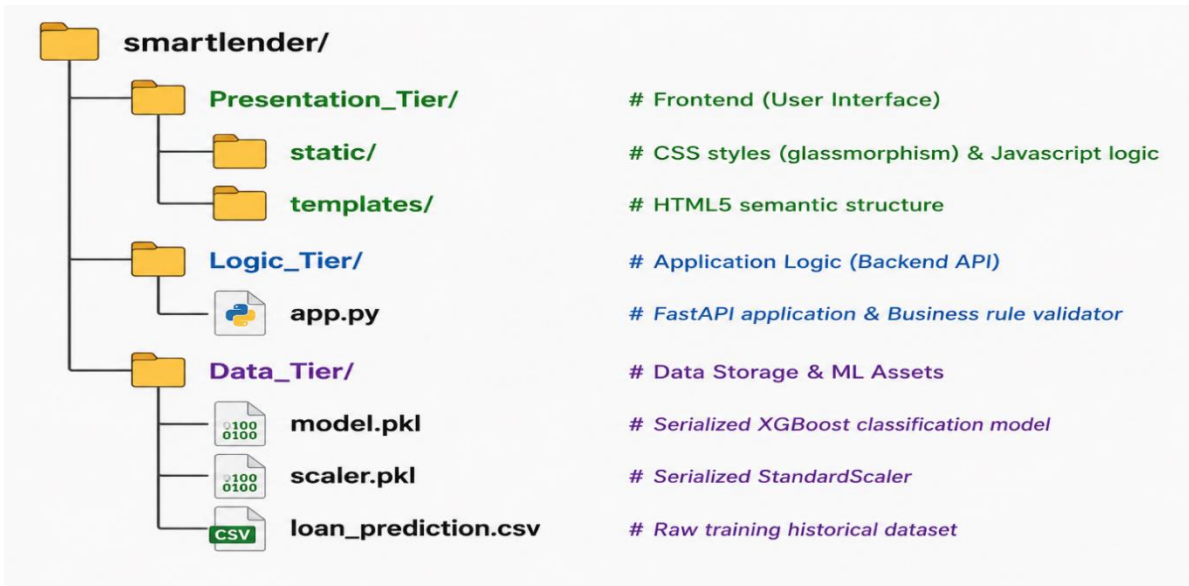

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env example or similar)	Yes
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	N/A
8	Dockerfile / Containerization config (if applicable)	N/A
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed
Login Credentials (Demo)	Username: jagdeesh Password:9398545965
Platform / Hosting Provider	Local Flask Server
Repository Link	https://github.com/imjagadeesh-ML/smartlender-ai
Demo Video Link	https://drive.google.com/file/d/12JUAZAeHWqR76tMoszKMjlRWObQkDc1/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Run Instructions

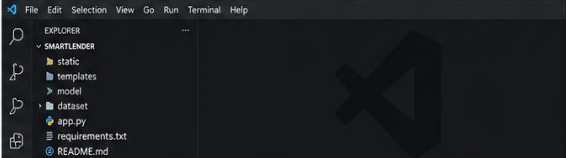

Follow the steps below to run the Smart Lender – Loan Eligibility Prediction System locally.

- 1

Download or Clone the Project
 Download the project ZIP file or clone the repository using Git.

```
PS C:\Projects> git clone https://github.com/your-username/smartlender.git
PS C:\Projects> cd smartlender
```
- 2

Open the Project
 Open the project folder in VS Code or PyCharm.

- 3

Install Dependencies
 Open the terminal in the project directory and install required libraries.

```
PS C:\Projects\smartlender> pip install -r requirements.txt
Collecting Flask
Collecting pandas
...(installation lines)
Successfully installed - all requirements satisfied!
```
- 4

Run the Flask Application
 Start the Flask web server.

```
PS C:\Projects\smartlender> python app.py
* Running on http://127.0.0.1:5000/ (Press CTRL+C to quit)
```
- 5

Open in Browser
 Open your web browser and go to <http://127.0.0.1:5000>

- 6

Make a Prediction
 Enter the applicant details in the form and click Predict to see the result.

Applicant Details

Gender: Male
Credit History: 1

Applicant Income: 5000

Loan Amount: 150

Predict

Prediction Result
Loan Approved
 Congratulations! You are eligible for the loan.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction depends on the training dataset quality.	Improve the dataset and retrain the model periodically.
2	Supports only predefined input features.	Extend the model with additional applicant attributes.
3	Local deployment limits scalability.	Deploy on IBM Cloud or another cloud platform for production.
